Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claims 1-9 and 14-23 are elected without traverse.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9 and 14-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Klersy et al (US 6,815,705).

The present claims generally call for an electrically programmable memory element which is made by a method comprising chemical mechanical polishing through a portion of an insulating third layer down to a conductive second layer coated on a first layer having an opening filled in part by a third layer.

Klersy et al disclose an electrically programmable element comprising a dielectric material **110**, a conductive layer **130**, and a dielectric layer **140**, which is made by a method comprising chemical mechanical polishing through a portion of an insulating layer down to a conductive second layer coated on a first layer having an opening filled at least in part by the third layer. See Figures 5-9, column 5, lines 40-50, column 6, lines

Art Unit: 2812

1-20 and column 8, lines 1-20. Klersy et al further discloses CMP through the second layer down to the first layer as required by Claim 2 and further forming an insulating layer. See Figures 5-7. Moreover, Klersy et al discloses a dielectric oxide formed by PECVD or TEOS, as required by Claims 5-8. See column 6, lines 50-60. Klersy also discloses the use of tungsten as a conductive layer. See column 8, lines 1-15.

Furthermore, Klersy et al disclose a memory cell material and electrodes as required by Claims 14-23. See column 14, lines 10-65 and Figures 39-43. Therefore the Klersy et al reference anticipates Claims 1-9 and 14-23.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander G. Ghyka whose telephone number is (571) 272-1669. The examiner can normally be reached on Monday through Thursday during general business hours.
